

### Overlap

With the composition of four legs and a tabletop, we have created a simple and neat table. Carved for a coexistence of softness and sharpness, the legs are assembled through the advanced technology known as three-way mitre joining. Per its name, this process joins members that come together from three directions at precise angles of 45 degrees, with no deviation. The 27-mm-thick top surface reposes atop the leg frame in an unassuming manner that deemphasizes its thickness.
