

Diamond back

Designed by Drill Design

A design studio with more than a decade-long experience in research of the Windsor chair, DRILL DESIGN has developed this iconic chair into an elegant lounge chair brimming with a strong presence. By merging the dichotomies of the classic/the modern and calmness/tension, the studio presented a new image of the Windsor chair.

The eight spokes on the backrest are constructed to gently embrace and support the back and waist of the user for a comfortable seating experience. The chair is characterized by the backrest with spokes interlaced into a diamond-shaped pattern, from which its name is derived. The seats of traditional Windsor chairs, made of solid wood, tend to warp over time, but the Diamond back chair adopts a frame structure and fabric upholstery for the seat to prevent warping. Furthermore, it offers comfort and reduced fatigue when sitting for a long period of time, while its lightweight design enhances mobility.

The frame that flows seamlessly from the back to the armrests is called a continuous arm, which is one of the features of traditional Windsor chairs. We recreated the sleek arm from a single solid wood using Japan's sophisticated bentwood technology.
