

DI

Designed by Kengo Kuma

Derived from the TS table, DI is a low, trapezoidal-shaped table created to match the front silhouette of the KA sofa. It comes in various sizes for use as a centre table or a side table. The tabletop and sideboards have a triangle shape at the cross-section. Only the bottom board has a different cross-sectional shape than the other three boards. A small gap between the floor and the bottom board creates a shadow to add lightness to the table. The flat space is also great for storing books and magazines.
