

### Offset

Designed by Drill Design

Offset offers a Thonet bentwood chair structure modeled from Windsor chairs. It features a ring as the seat frame and another ring to anchor the legs. By overlapping these two rings of the same diameter, chairs can be stacked together in a completely new way.

This new way to stack chairs and Japanese wood bending techniques are well combined, while inheriting the concept of the Windsor chair. By attaching the rattan sheet to the seat, the weight becomes light and the chair has a sense of nostalgia.
