

trifle

Designed by Daisuke Kitagawa

Trifle is a side table that was created by product designer Daisuke Kitagawa. He combined two functional elements, one a side table and the other a magazine holder or a trash bin, by the simple shaping of the object in a horizontal fashion.

The sharply cut slit opening and the paper-thin metal construction of this piece makes an impression of delicate and sharp but solid at the same time. Trifle reflects the bond between the creative team of artisans skilled in metalwork and metal coating, acting under the direction of the designer, Kitagawa.
