

Fan back high Windsor

The Windsor chair, durable and comfortable, has diversified to match different times and regions and continues to exert a significant influence on chair design.

This Fan back high Windsor is made by hand, one by one, by skilled craftsmen employing traditional methods. The definition of the Windsor chair is generally considered a chair with a thick wooden seat and legs and back connected by a tenon joint. While faithfully preserving the primary form of the long-beloved Windsor chair, the high chair type, fitting into spaces such as the kitchen counter, creates a gentle and warm atmosphere in contemporary life.
