

Living environment for ecosystem

We sought comfort that allows users to relax and entrust their entire body to it amidst a sofa with a standard design. The seat comprises two layers, a base seat, a seat cushion, and the base seat contains multiple layers of urethane for an appropriate bounciness.

By adding a back cushion with the same internal structure, the seat and the backrest bounciness is similar. It can be selected that a table to be positioned on the side or backrest of the sofa. By combining a table with it, an unconstrained and wide space can be created, and the combination of different materials makes diverse expressions possible.

Living environment for ecosystem
