

Lyon

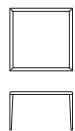

This is a four-legged dining table that has the basic shape of table. It has a very simple form, but the miter treatment of the tabletop frame portion requires a high level of accuracy and it is equipped with a density as a product. It is made up of elliptical legs that extend straight and smoothly and a thick wood veneer tabletop, can be made at a lower cost as compared to tables made only with solid wood, and also boasts a light weight. The knockdown mechanism is made in-house and the structure with removable legs is convenient when setting up the table.
