

Poetic scape desk

This is a desk that can create a poetic space and time by placing a single chair in the center of the desk. Drawers attach to both sides of the desk as if floating above the floor, while the drawers are decorated with beadings. Desks and other furniture take on meaning as tools only when people are present; it is the presence of people that creates a scene. We can sense the beauty in places and furniture that allow us more private time to slow down and quietly drift into contemplation.
