

Spindle stool, Spindle high stool

This stool inspired by Windsor chair that is continually loved by the world as its basic design. Windsor chair is a chair built with a thick solid wooden seat into which the back spokes and legs are directly pushed. The chair of stability is secured by this practicable construction. Craftsmen who have inherited traditional methods carefully make it, carrying out almost the entire process by hand. This is a highly convenient stool made up of legs thinly carved into soft curves and a comfortable seat and has a delicate and quiet appearance.
