

### Tasogare composition cabinet

Among our product collection that values the presence and quiet dignity of our products, this product is special in using of gold and silver leaf. Through this product, we would like to promote the combination of a modern design with traditional materials and techniques. Since gold and silver are thin, the wood grain shows through. The appearance of the leaf harmonized with the natural wood grain reflects Japanese elegance.

Although the furniture is movable, it can be also a decorative background to space, like a folding screen picture.
