

### Arashiyama Sways in the Wind

Inspired by Kyoto's celebrated Arashiyama bamboo grove, the Arashiyama Sways in the Wind modular shelving system mimics bamboo stalks with its cylindrical wooden posts. The design creates a partition-like effect, evoking dappled light filtering through slender trees. Its adaptable structure brings rhythm and poetic charm to interiors, harmonizing natural beauty with functional versatility. Ideal for creating unique layouts, this shelving system adds a dynamic element to any room, making it a captivating addition to modern living spaces.
