

Spacecraft

The Spacecraft pendant lamp features bold, dynamic curves that evoke the image of a futuristic spacecraft. Made from Akita cedar and Mino washi paper, it combines Japanese materials and craftsmanship in an innovative design. The bentwood frame, achieved through advanced techniques, pushes the boundaries of material possibilities. Hand-applied washi paper diffuses light gently, creating a warm, inviting glow. The lamp's low-profile design makes it adaptable to various ceiling heights, offering a striking yet subtle lighting solution for different spaces.
