

### Woodpecker

Designed by Yang Hen Chen

The Woodpecker table draws inspiration from the rhythmic pecking of a woodpecker, capturing the motion and sound of this natural behavior. The design marries wood and metal, balancing the sharpness of metal with the warmth of wood. This table is not only practical but also a form of artistic expression, bringing nature's vibrant rhythm into daily life. Its distinctive visual appeal makes it a dynamic addition to any space, blending functionality with a sense of nature's movement.
