

Zhang

While inheriting its continental design, the tabletop and legs were made using a three-way miter joint that we were unable to realize in the past. Three-way miter joint is an extremely difficult method, but it is a technique that most beautifully expresses the beading design on the frame.

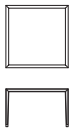

At first glance, it is a table with a simple design, but it is filled with technology and knowledge to secure its strength. Even for furniture, our craftsmen's expert experience and passion create products with a high level of completion.
