

### The horizon of the floating layer

A seating system imagined after a comfortable living environment that floats gently in space. This system spreads horizontally through living space and the warm, solid wood frame rises from the floor to create a new spatial layer. The frame supports the slim seating with a springiness structure that provides moderate elasticity. To create a gentler seating experience, the seats and backrests were designed with deeper strokes than conventional sofa seating. This seating system floats in space and, with its flexible layout, can bring change to organic, dynamic, and nature-like environments.
